

Progress in Psychodiagnostics: DSM-5-TR (from -5 and -IV-TR) - 3 CEU

SEPTEMBER 16 | 1 PM - 4:15 PM PT

This virtual clinical workshop is for all clinicians to stay **abreast of contemporary progress in psychodiagnostics**.

Dr. Tyler M. Argüello will explore history, politics, and the gestalt of the age of DSM-5-TR, as well as the multitude of criterion and coding changes aligned with ICD-11.

Non-member: \$50
Student: \$15

Dr. Tyler M.
Argüello,
PhD, DCSW

Learning objectives:

- Describe the philosophy, fundamental changes, and key progress from the (DSM-IV-TR to) DSM-5 to DSM-5-TR.
- Understand and crosswalk substantive diagnostic criteria changes, text revisions, and coding alterations between the DSM-5 and -5-TR for major mental illnesses and common mental health conditions.
- Identify critical cultural considerations for psychodiagnosing that can inform more responsive and competent assessments and treatment planning.
